8th ANNUAL CONFERENCE

INDIAN ACADEMY OF CEREBRAL PALSY

WIDEN YOUR HORIZONS

Cerebral palsy is currently a leading cause of disability in children. Rehabilitation of these children requires special knowledge and training.

[Indian Academy of Cerebral Palsy \(IACP\)](#) is a national body of professionals working for children with cerebral palsy. The annual conference of IACP - IACPCON provides a national forum for sharing, spreading and exchange of knowledge, ideas and educational information. Experts from all disciplines who work for prevention, diagnosis and management of children with cerebral palsy and other childhood-onset disabilities attend this meeting. This conference is also a platform to interact with the national and international experts of this field. These meetings are organized in different parts of country to spread knowledge to every corner of India.

This year IACPCON will be at Ahmedabad from 20th to 22nd December'13. Its scientific program is designed with the objective of providing current and upcoming information regarding diagnosis and treatment of cerebral palsy. For all those who want to remain updated with current concepts and recent advances in the subject, IACPCON 2013 is a rare opportunity. Like previous IACPCONs, this year meeting will also facilitate budding and practising therapists to improve their skill and knowledge. The scientific program will provide 360* overview of management. Guest lectures, interactive sessions, debates and 'how I do it differently' are the special features of this conference.

Everyone who is practising in this field or willing to pursuit this specialty should not miss this unique opportunity.

For further information contact - iacppf@gmail.com

How I do it differently?

This is a new session which we are introducing in this conference. Delegate can present their innovative idea. This idea may be simplification or modification of existing technique or an early report of new procedures. Short presentation of maximum 4 minutes will be followed by one or two questions from audience. If you wish to participate in this session, please let us know at earliest. You can email us on iacppf@gmail.com regarding your innovations.
